Surge protection of power supply

Combined arrester type 1 + 2 + 3 for AC power supplies / PowerPro

Leakage-current free version to protect the foundation grounding electrode against AC-caused corrosion. Single-pole SPD used as equipotential bonding lightning surge protection in different kind of power net systems.

- Test standard: IEC 61643-11 / EN 61643-11
- Applicable at the boundaries LPZ 0A - 2 and higher
- Combined Arresters Class I+II+III (T1+T2+T3)
- No blow-out vents, thus, not requiring any safety clearance to other installations
- Rare-gas-filled spark gap, hermetically sealed
- Surge arrester based on varistors (MOV) and GDT
- Very low voltage protection level
- Mounting on 35 mm DIN rail (EN 60715)
- Remote signalling contact: break contact
- EAC certification
