## Surge protection of power supply

### Lightning current arrester Type 1 for AC power supplies / PowerPro

**Multi-pole lightning current arrester (class I) for 1-phase TN systems for protection of low-voltage consumers' installations in business and residential areas against surges caused by lightning or switching actions in the network. The arresters can be installed at the transition OA to 1 according to the lightning protection zones concept.**

- Test standard: IEC 61643-11 / EN 61643-11
- No leakage currents, thus, allowing installation upstream of power meters
- Operates independently of atmospheric air pressure and ambient humidity
- Serial wiring with multi-functional terminals
- Mounting on 35 mm DIN rail (EN 60715)
- Degree of protection according to IEC EN 60529: IP 20
- EAC certification
- Remote signalling contact: break contact
